

June 8, 1927.

Mrs. Maria DeMarco,
Box 27,
Helper, Utah.

Dear Madam;

RE: PRICE DIST.

I have your letter of June 7 and am sorry that your trouble still continues. On the other hand I see no possibility of being able to have the water commissioner devote the bulk of his time and attention to this difficulty.

On Monday I had a conference with the attorney for the Eleganti's and I agreed to send an engineer from this office down into the field to get the exact location of the various springs and points of diversion and hope to settle this matter. I expect to have a complete report the latter part of this week and will then try to make a settlement with the Eleganti attorney on the basis of the actual rights.

It seemed very important to have this investigation made at once so I did not take the time to communicate with you and ascertain if you were willing to stand half of the expense of this trip, the Eleganti people to pay the other half. I believe that under the circumstances it is well worth your while to pay half of these expenses and I would appreciate hearing from you that such an arrangement is agreeable.

Yours very truly,

State Engineer.
